 **Technology  
Exchange**

# FUTURE TECH '22

## WELCOME

With the ever-changing technology environment, along with rapid advancements in the industry, Technology Exchange is proud to be organising the first **FUTURE TECH** workshop, sponsored by Talia.

The event will be held in Basra on the 11 & 12 of May 2022 and will bring together leading industry experts to share their knowledge and experience on a range of prospective technology topics, while providing attendees with an opportunity to network with like-minded professionals, meet investors, stay ahead in their sector, cultivate new perspectives, and gain valuable insight in latest technology thinking.

We hope you enjoy your time and learn about the future of technology while you take advantage of the wealth of opportunity at the first **FUTURE TECH** event.

**ALAN AFRASIAB**

CEO & President of  
Talia Communications Ltd

# WORKSHOP

**FUTURE TECH** has invited key speakers and partners to present topics including; Cyber Security, Licensing and Regulations, Health & Safety in the Oil & Gas Industry, the Future of the Space Industry, IoT, Microwave Technology and 5G & 6G. With the chance to spark innovative conversations, members will get a deeper insight into how specific technologies can impact or improve the way in which they operate.

# NETWORKING

**FUTURE TECH** gives participants the opportunity to make valuable connections, and meet like-minded people all sharing views on how technology can impact their business.

# LEARN MORE

**FUTURE TECH** is hosted by Technology Exchange, an innovative, collaborative technology consultancy firm where clients are introduced to world-class expertise. Through Technology Exchange, you can envision, design and develop solutions that allow your business to excel. With the same ethos and goal, Technology Exchange brings you the focused and elevating Future Tech event, where companies can take their first steps in evolving through technology.

# MEET YOUR SPEAKERS

## **Wael Alkhalidi**

### **How will new innovations in AI and blockchain technology change our daily lives**

As Talia's Senior VP of Global Sales, Wael also possesses expert-level knowledge about decentralised blockchain technology which provides an outlet for personal wealth that is beyond restriction and confiscation.

## **Jack Buechler**

### **The future of the space industry**

VP of vice president of business development and product management and founder of GVF, with decades in the business, Jack Buechler provides extensive, in-depth knowledge on the telecommunications industry, focusing specifically on LEO, MEO and GEO satellites.

## **Renato Goodfellow**

### **The imminent rise of 5G and 6G technology**

As the head of global satellite at BT with over 40 years in the company, there is no better person to speak on the ever-changing mobile technology industry, specifically focusing on 5G while bringing you a premature insight into the rise of 6G in the future.

### **Martin Jarrold**

#### **How to effectively license and regulate your business within the multifaceted energy industry?**

In the complex energy sector, it is crucial to be correctly licensed and sticking to guidelines to truly propel in the industry. Therefore, there is no better person for details on how to fully license for the energy sector.

### **Stewart Phillips**

#### **Provide your business with world-class health and safety regulations**

As VP of service delivery and customer assurance, Stewart has 34 years of Field Engineering, Project and customer support management with a strong focus on international Oil and Gas customers and projects.

### **John Watts**

#### **How will the energy sector protect itself from increasingly aggressive cyber threats?**

With companies around the world being heavily reliant on the internet, cyber threats are becoming more common causing greater impacts. John from the prestigious global advocacy and cyber security firm will provide you with the greatest tools and information to protect your firm from any cyber-harm.
